ROSEDALE  
ACADEMY

## Course List

	Subject	Code	Course Name	Grade
1	ESL	ESLAO	English as a Second Language, A Level	Open
2	ESL	ESLBO	English as a Second Language, B Level	Open
3	ESL	ESLCO	English as a Second Language, C Level	Open
4	ESL	ESLDO	English as a Second Language, D Level	Open
5	ESL	ESLEO	English as a Second Language, E Level	Open
6	EAP	EAP1	EAP Intermediate 1	Open
7	EAP	EAP2	EAP Intermediate 2	Open
8	EAP	EAP3	EAP Advanced 1	Open
9	EAP	EAP4	EAP Advanced 2	Open
10	EAP	EAP5	EAP High Advanced 1	Open
11	EAP	EAP6	EAP High Advanced 2	Open
12	English	ENG4U	English	12
13	English	OLC4O	Ontario Secondary School Literacy Course	Open
14	English	ENG3U	English	11
15	Mathematics	MHF4U	Advanced Functions	12
16	Mathematics	MCV4U	Calculus and Vectors	12
17	Mathematics	MDM4U	Mathematics of Data Management	12
18	Mathematics	MCR3U	Functions	11
19	Mathematics	MPM2D	Principles of Mathematics	10
20	Mathematics	MTH1W	Principles of Mathematics	9
21	Science	SCH4U	Chemistry	12
22	Science	SPH4U	Physics	12
23	Science	SBI4U	Biology	12
24	Science	SCH3U	Chemistry	11
25	Science	SPH3U	Physics	11
26	Science	SBI3U	Biology	11
27	Science	SNC2D	Science	10
28	Computer Science	ICS4U	Computer Science	12
29	Computer Science	ICS3U	Introduction to Computer Science	11
30	Business	BBB4M	International Business Fundamentals	12
31	Business	BOH4M	Business Leadership	12
32	Business	BAT4M	Financial Accounting Principles	12

33	Business	BAF3M	Introduction to Financial Accounting	11
34	Business	BBI2O	Introduction to Business	10
35	Business	BTT2O	Information and Communication Technology in Business	10
36	Business	BBI1O	Introduction to Business	9
37	Business	BTT1O	Information and Communication Technology in Business	9
38	Arts	AWR4M	Visual Arts - Film/Video	12
39	Arts	ASM4M	Media Arts - Animation	12
40	Arts	AWT4M	Visual Arts - Game Design	12
41	Arts	AWS4M	Visual Arts - Digital Design	12
42	Arts	AWR3M	Visual Arts - Film/Video	11
43	Arts	ASM3M	Media Arts - Animation	11
44	Arts	AWT3M	Visual Arts - Game Design	11
45	Arts	AWS3M	Visual Arts - Digital Design	11
46	Arts	ASM2O	Media Arts	10
47	Arts	AVI2O	Visual Arts	10
48	Arts	ADA2O	Drama	10
49	Arts	AVI1O	Visual Arts	9
50	Canadian & World Studies	CPW4U	Canadian and International Politics	12
51	Canadian & World Studies	CIA4U	Analyzing Current Economic Trends	12
53	Canadian & World Studies	CHY4U	World History since the Fifteenth Century	12
53	Canadian & World Studies	CHC2P	Canadian History since World War I	10
54	Social Science Humanities	HFA4U	Nutrition & Health	12
55	Guidance & Career Education	GWL3O	Designing Your Future	11
56	Guidance & Career Education	GLS1O	Learning Strategies	9
57	Language	LKBDU	Simplified Chinese	12
58	Language	LKBCU	Simplified Chinese	11

## Course Description

In this section, you can find the descriptions of all Rosedale courses. To get more detailed information about each course, you can:

- View the Course Outlines for each course on Rosedale Digital Learning Platform of each course.
- Access Ontario curriculum policy documents at: <http://www.edu.gov.on.ca/eng/curriculum/secondary/subjects.html>

### English Language Courses

#### **ESLAO - English as a Second Language, ESL Level 1 – Open**

This course builds on students' previous education and language knowledge to introduce them to the English language and help them adjust to the diversity in their new environment. Students will use beginning English language skills in listening, speaking, reading, and writing for everyday and essential academic purposes. They will engage in short conversations using basic English language structures and simple sentence patterns; read short, adapted texts; and write phrases and short sentences. The course also provides students with the knowledge and skills they need to begin to adapt to their new lives in Canada.

*Prerequisite: None*

#### **ESLBO - English as a Second Language, ESL Level 2 – Open**

This course extends students' listening, speaking, reading, and writing skills in English for everyday and academic purposes. Students will participate in conversations in structured situations on a variety of familiar and new topics; read a variety of texts designed or adapted for English language learners; expand their knowledge of English grammatical structures and sentence patterns; and link English sentences to compose paragraphs. The course also supports students' continuing adaptation to the Ontario school system by expanding their knowledge of diversity in their new province and country.

*Prerequisite: ESLAO or English Proficiency Test Scores*

#### **ESLCO - English as a Second Language, ESL Level 3 – Open**

This course further extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will make short classroom oral presentations; read a variety of adapted and original texts in English; and write using a variety of text forms. As well, students will expand their academic vocabulary and their study skills to facilitate their transition to the mainstream school program. This course also introduces students to the rights and responsibilities inherent in Canadian citizenship, and to a variety of current Canadian issues.

*Prerequisite: ESLBO or English Proficiency Test Scores*

### **ESLDO - English as a Second Language, ESL Level 4 – Open**

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations and to participate in Canadian society as informed citizens. Students will develop the oral presentation, reading, and writing skills required for success in all school subjects. They will extend listening and speaking skills through participation in discussions and seminars; study and interpret a variety of grade-level texts; write narratives, articles, and summaries in English; and respond critically to a variety of print and media texts.

*Prerequisite: ESLCO or English Proficiency Test Scores*

### **ESLEO - English as a Second Language, ESL Level 5 – Open**

This course provides students with the skills and strategies they need to make the transition to college and university preparation courses in English and other secondary school disciplines. Students will be encouraged to develop independence in a range of academic tasks. They will participate in debates and lead classroom workshops; read and interpret literary works and academic texts; write essays, narratives, and reports; and apply a range of learning strategies and research skills effectively. Students will further develop their ability to respond critically to print and media texts.

*Prerequisite: ESLDO or English Proficiency Test Scores*

### **EAP 1 – English Academic Pathway, Intermediate Level 1 - Open**

This course further extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will make short classroom oral presentations and express their opinions on topics of interest. They will read a variety of adapted and original texts in English while also learning key reading strategies like skimming and scanning. Students will also write using a variety of narrative, descriptive, and explanatory text forms. As well, students will expand their academic vocabulary and their study skills to facilitate their transition to the advanced EAP.

*Prerequisite: None*

### **EAP 2 – English Academic Pathway, Intermediate Level 2 - Open**

This course further extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will learn and use phrases to effectively communicate their point of view within a variety of scenarios. They will identify key information and relationships within fiction and nonfiction texts. Furthermore, students will scaffold the writing process by taking notes, summarizing, and outlining for writing tasks. As well, students will learn, practice, and expand their reading, writing, speaking, and listening strategies to facilitate their transition to the advanced EAP.

*Prerequisite: EAP 1 or English Proficiency Test Scores*

### **EAP 3 - English Academic Pathway, Advanced Level 3 - Open**

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations. Students will develop speaking, writing, listening, and reading skills required for success in all subject areas. Students will also build academic skills needed to succeed in university or college. A focus is placed on the ability to identify various components of an argument, including opinions, facts, and persuasive language. Students will reinforce these skills by participating in academic discussions. They will also build effective research skills.

*Prerequisite: EAP 2 or English Proficiency Test Scores*

### **EAP 4 - English Academic Pathway, Advanced Level 4 - Open**

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations. Students build academic skills, such as researching, planning, and editing. They will also build communication skills that will allow them to participate in classroom discussions and debates, as well as confidently ask questions and have conversations with professors. This course culminates in a major research presentation and essay, giving students the chance to see the expectations of students in English-speaking universities.

*Prerequisite: EAP 3 or English Proficiency Test Scores*

### **EAP 5 – English Academic Pathway, High Advanced Level 5 - Open**

This course provides students with the skills and strategies they need to make the transition to college and university courses. They will participate in debates and lead classroom workshops on relevant social topics. They will read and interpret authorial purpose, text features, and organization themes within a variety of text forms. Students will also apply the writing process (brainstorming, outlining, drafting, and editing) to write essays, narratives, and reports. As well, students will learn, practice, and refine a range of learning strategies and research skills.

*Prerequisite: EAP 4 or English Proficiency Test Scores*

### **EAP 6 – English Academic Pathway, High Advanced Level 6 - Open**

This course provides students with the skills and strategies they need to make the transition to college and university courses. Students will critically engage with research to synthesize ideas and evaluate the quality of the source. They will use language with precision and clarity by incorporating stylistic devices appropriately and effectively to convey their unique perspective. In addition, they will communicate within structured peer and group panels to practice using linguistically complex language. Students will develop literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life.

*Prerequisite: EAP 5 or English Proficiency Test Scores*

## English Courses

### **ENG4U - English, Grade 12, University Preparation**

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

*Prerequisite: ENG3U - English, Grade 11, University Preparation*

### **OLC40 - Ontario Secondary School Literacy Course, Grade 12, Open**

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

*Eligibility Requirement: Students who have been eligible to write the OSSLT at least twice and who have been unsuccessful at least once are eligible to take the course.*

### **ENG3U - English, Grade 11, University Preparation**

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse challenging literary texts from various periods, countries, and cultures, as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university or college preparation course.

*Prerequisite: ENG2D - English, Grade 10, Academic / ESLEO*

## Math Courses

### **MHF4U - Advanced Functions, Grade 12, University Preparation**

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining

functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

*Prerequisite: MCR3U - Functions, Grade 11, University Preparation*

### **MCV4U - Calculus and Vectors, Grade 12, University Preparation**

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course.

*Prerequisite: MHF4U - Advanced Functions, Grade 12, University Preparation*

### **MDM4U - Mathematics of Data Management, Grade 12, University Preparation**

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing and analysing large amounts of information; solve problems involving probability and statistics; and carry out a culminating investigation that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.

*Prerequisite: MCR3U - Functions, Grade 11, University Preparation*

### **MCR3U - Functions, Grade 11, University Preparation**

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

*Prerequisite: MPM2D - Principles of Mathematics, Grade 10, Academic*

### **MPM2D - Principles of Mathematics, Grade 10, Academic**

This course enables students to broaden their understanding of relationships and extend their problemsolving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically and communicate their thinking as they solve multistep problems.

*Prerequisite: MPM1D - Mathematics, Grade 9, Academic*

### **MTH1W - Mathematics, Grade 9, De-streamed**

This course enables students to consolidate, and continue to develop, an understanding of mathematical concepts related to number sense and operations, algebra, measurement, geometry, data, probability, and financial literacy. Students will use mathematical processes, mathematical modelling, and coding to make sense of the mathematics they are learning and to apply their understanding to culturally responsive and relevant real-world situations. Students will continue to enhance their mathematical reasoning skills, including proportional reasoning, spatial reasoning, and algebraic reasoning, as they solve problems and communicate their thinking.

*Prerequisite: None*

## **Science Courses**

### **SCH4U - Chemistry, Grade 12, University Preparation**

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

*Prerequisite: SCH3U - Chemistry, Grade 11, University Preparation*

### **SPH4U - Physics, Grade 12, University Preparation**

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of

technological applications of physics on society and the environment.

*Prerequisite: SPH3U - Physics, Grade 11, University Preparation*

### **SBI4U - Biology, Grade 12, University Preparation**

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

*Prerequisite: SBI3U - Biology, Grade 11, University Preparation*

### **SCH3U - Chemistry, Grade 11, University Preparation**

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

*Prerequisite: SNC2D - Science, Grade 10, Academic*

### **SPH3U - Physics, Grade 11, University Preparation**

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyze the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment.

*Prerequisite: SNC2D - Science, Grade 10, Academic*

### **SBI3U - Biology, Grade 11, University Preparation**

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

*Prerequisite: SNC2D - Science, Grade 10, Academic; Recommendation: ESLDO*

### **SNC2D - Science, Grade 10, Academic**

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter.

*Prerequisite: SNC1D - Science, Grade 9, Academic*

## **Computer Science Courses**

### **ICS4U - Computer Science, Grade 12, University Preparation**

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyse algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field.

*Prerequisite: ICS3U - Introduction to Computer Science, Grade 11, University Preparation*

### **ICS3U - Introduction to Computer Science, Grade 11, University Preparation**

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development lifecycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields.

*Prerequisite: None*

## **Business Courses**

### **BBB4M - International Business Fundamentals, Grade 12, University/College Preparation**

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for postsecondary programs in business, including international business, marketing, and management.

*Prerequisite: None*

### **BOH4M - Business Leadership: Management Fundamentals, Grade 12, University/College Preparation**

This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized.

*Prerequisite: None*

### **BAT4M - Financial Accounting Principles, Grade 12, University/College Preparation**

This course introduces students to advanced accounting principles that will prepare them for postsecondary studies in business. Students will learn about financial statements for various forms of business ownership and how those statements are interpreted in making business decisions. This course expands student's knowledge of sources of financing, further develops accounting methods for assets, and introduces accounting for partnerships and corporations.

*Prerequisite: BAF3M - Financial Accounting Fundamentals, Grade 11, University/College Preparation*

### **BAF3M - Introduction to Financial Accounting, Grade 11, University/College Preparation**

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and ethics and current issues in accounting.

*Prerequisite: None*

### **BBI20 - Introduction to Business, Grade 10, Open**

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

*Prerequisite: None*

### **BTT20 - Information and Communication Technology in Business, Grade 10, Open**

This course introduces students to information and communication technology in a business environment and builds a foundation of digital literacy skills necessary for success in a technologically driven society. Students will develop word processing, spreadsheet, database, desktop publishing, presentation software, and website design skills. Throughout the course, there is an emphasis on digital

literacy, effective electronic research and communication skills, and current issues related to the impact of information and communication technology.

*Prerequisite: None*

### **BBI10 - Introduction to Business, Grade 9, Open**

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

*Prerequisite: None*

### **BTT10 - Information and Communication Technology in Business, Grade 9, Open**

This course introduces students to information and communication technology in a business environment and builds a foundation of digital literacy skills necessary for success in a technologically driven society. Students will develop word processing, spreadsheet, database, desktop publishing, presentation software, and website design skills. Throughout the course, there is an emphasis on digital literacy, effective electronic research and communication skills, and current issues related to the impact of information and communication technology.

*Prerequisite: None*

## **Art Courses**

### **AWR4M - Visual Arts - Film/Video, Grade 12, University/College Preparation**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through photography and filmmaking. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design).

*Prerequisite: None*

### **ASM4M - Media Arts (Animation), Grade 12, University/College Preparation**

This course emphasizes the refinement of media arts skills through the creation of a thematic body of work by applying traditional and emerging technologies, tools, and techniques such as multimedia, computer animation, installation art, and performance art. Students will develop works that express their views on contemporary issues and will create portfolios suitable for use in either career or postsecondary education applications. Students will critically analyse the role of media artists in

shaping audience perceptions of identity, culture, and community values.

*Prerequisite: ASM3M*

### **AWT4M - Game Design, Grade 12, University/College Preparation**

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts. The course will be delivered as a comprehensive program focused on game design.

*Prerequisite: AWT3M*

### **AWS4M - Digital Design – Grade 12, University/College Preparation**

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts. The course will be delivered as a comprehensive program focused on digital design.

*Prerequisite: AWS3M*

### **AWR3M - Visual Arts - Film/Video, Grade 11, University/College Preparation**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through photography and filmmaking. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design).

*Prerequisite: ASM20/AVI20*

### **AWR3M - Media Arts (Animation), Grade 11, University/College Preparation**

This course focuses on the development of media arts skills through the production of art works involving traditional and emerging technologies, tools, and techniques such as new media, computer animation, and web environments. Students will explore the evolution of media arts as an extension of traditional art forms, use the creative process to produce effective media art works, and critically

analyse the unique characteristics of this art form. Students will examine the role of media artists in shaping audience perceptions of identity, culture, and values.

*Prerequisite: ASM20/AVI20*

### **AWT3M - Game Design, Grade 11, University/College Preparation**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include multimedia works and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course will be delivered as a comprehensive program focused on game design.

*Prerequisite: ASM20/AVI20*

### **AWS3M - Digital Design, Grade 11, University/College Preparation**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include multimedia works and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course will be delivered as a comprehensive program focused on digital design.

*Prerequisite: ASM20/AVI20*

### **ASM20 - Media Arts, Grade 10, Open**

This course enables students to create media art works by exploring new media, emerging technologies such as digital animation, and a variety of traditional art forms such as film, photography, video, and visual arts. Students will acquire communications skills that are transferable beyond the media arts classroom and develop an understanding of responsible practices related to the creative process. Students will develop the skills necessary to create and interpret media art works.

*Prerequisite: None*

### **AVI20 - Visual Arts, Grade 10, Open**

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

*Prerequisite: None*

### **ADA20 - Drama, Grade 10, Open**

This course provides opportunities for students to explore dramatic forms, conventions, and techniques. Students will explore a variety of dramatic sources from various cultures and representing a range of genres. Students will use the elements of drama in creating and communicating through dramatic works. Students will assume responsibility for decisions made in the creative and collaborative processes and will reflect on their experiences.

*Prerequisite: None*

### **AVI10 - Visual Arts, Grade 9, Open**

This course is exploratory in nature, offering an overview of visual arts as a foundation for further study. Students will become familiar with the elements and principles of design and the expressive qualities of various materials by using a range of media, processes, techniques, and styles. Students will use the creative and critical analysis processes and will interpret art within a personal, contemporary, and historical context.

*Prerequisite: None*

## **Canadian & World Studies Courses**

### **CPW4U - Canadian & International Politics, Grade 12, University Preparation**

This course explores various perspectives on issues in Canadian and world politics. Students will explore political decision making and ways in which individuals, stakeholder groups, and various institutions, including governments, multinational corporations, and non-governmental organizations, respond to and work to address domestic and international issues. Students will apply the concepts of political thinking and the political inquiry process to investigate issues, events, and developments of national and international political importance, and to develop and communicate informed opinions about them.

*Prerequisite: ENG3U - English, Grade 11, University Preparation*

### **CIA4U - Analyzing Current Economic Issues, Grade 12, University Preparation**

This course examines current Canadian and international economic issues, developments, policies, and practices from diverse perspectives. Students will explore the decisions that individuals and institutions, including governments, make in response to economic issues such as globalization, trade agreements, economic inequalities, regulation, and public spending. Students will apply the concepts of economic thinking and the economic inquiry process, as well as economic models and theories, to investigate, and develop informed opinions about, economic trade-offs, growth, and sustainability and related economic issues.

*Prerequisite: ENG3U - English, Grade 11, University Preparation*

### **CHY4U - World History since the Fifteenth Century, Grade 12, University Preparation**

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and ideas and assess societal progress or decline in world history.

*Prerequisite: ENG3U - English, Grade 11, University Preparation*

### **CHC2P - Canadian History since World War I, Grade 10, Applied**

This course focuses on the social context of historical developments and events and how they have affected the lives of people in Canada since 1914. Students will explore interactions between various communities in Canada as well as contributions of individuals and groups to Canadian heritage and identity. Students will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating the continuing relevance of historical developments and how they have helped shape communities in present-day Canada.

*Prerequisite: None*

## **Social Science Humanities Courses**

### **HFA4U - Nutrition & Health, Grade 12, University Preparation**

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health.

*Prerequisite: ENG3U - English, Grade 11, University Preparation*

## **Guidance & Career Education Courses**

### **GWL30 - Designing Your Future, Grade 11, Open**

This course prepares students to make successful transitions to postsecondary destinations as they investigate specific postsecondary options based on their skills, interests, and personal characteristics. Students will explore the realities and opportunities of the workplace and examine factors that affect success, while refining their job-search and employability skills. Students will develop their portfolios

with a focus on their targeted destination and develop an action plan for future success.

*Prerequisite: None*

### **GLS10 - Learning Strategies: Skills for Success in Secondary School, Open**

This course focuses on learning strategies to help students become better, more independent learners. Students will learn how to develop and apply literacy and numeracy skills, personal management skills, and interpersonal and teamwork skills to improve their learning and achievement in school, the workplace, and the community. The course helps students build confidence and motivation to pursue opportunities for success in secondary school and beyond.

*Prerequisite: None*

## **Language Courses**

### **LKBDU - Simplified Chinese – Level 3, University Preparation**

This course offers students opportunities to further develop their knowledge of simplified Chinese and to enhance their communication skills. Students will use increasingly sophisticated language in a variety of activities that will enable them to speak and write with clarity and accuracy. Students will also enhance their thinking skills through the critical study of literature, and continue to explore aspects of the culture of China where the language is spoken through a variety of print and technological resources.

*Prerequisite: None*

### **LKBCU - Simplified Chinese – Level 2, University Preparation**

This course offers students opportunities to further develop their knowledge of simplified Chinese and to enhance their communication skills. Students will use increasingly sophisticated language in a variety of activities that will enable them to speak and write with clarity and accuracy. Students will also enhance their thinking skills through the critical study of literature, and continue to explore aspects of the culture of China where the language is spoken through a variety of print and technological resources.

*Prerequisite: None*
